SUMMARY

B.Tech Computer Science & Engineering student at Haridwar University with interests in artificial intelligence, technology, entrepreneurship and startups. Learning through hands-on projects in C and JavaScript/React.

EDUCATION

B.Tech, Computer Science & Engineering — Haridwar University

PROJECTS

CampusVault (team project) — React 19, Vite, JavaScript — GitHub repo

- Responsive campus resource-sharing demo for underused campus equipment and spaces, using browser-local fictional data.
- Features: catalogue search/filter, booking requests, staff approval/rejection/waitlist, overlap detection, resource management, checkout/return notes, incident reports, notices and activity trail.
- Supabase schema and policy groundwork exists; the app is not yet connected to Supabase Auth or backend reads/writes (not a production backend).

Mad Libs Story Generator — C — GitHub repo

- Beginner-friendly console app that takes user-entered words and generates a funny, personalized story.
- Uses variables, character arrays, printf/scanf, string handling and basic I/O.

TECHNICAL SKILLS

Languages: C, JavaScript, HTML/CSS
Tools & frameworks: React, Vite, Git/GitHub; foundational exposure to Supabase schema design

STRENGTHS

Problem solving, teamwork, communication and presentation

ACTIVITIES

Smart India Hackathon (SIH) 2026 — Participant, Team FutureStack

INTERESTS

Artificial intelligence, technology, entrepreneurship and startups
